

Year 4 States of Matter- What are solids, liquids and gases?

Glossary

The Water Cycle

Red Hill Riches

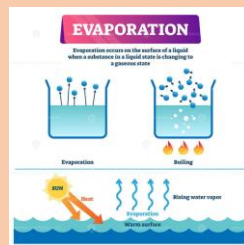

I know:

Materials can be grouped as solids, liquids or gases.

Some materials change state when they are heated or cooled

When liquids turn into gasses, this is called evaporation. The reverse process is called condensation.

Evaporation

Condensation

Linked Learning

Water freezes when it is cold

There is frost and snow in the Winter

Materials have different properties
