

30 house points:

- Create a lunar diary – look at the night sky each night for a month and record what the moon looks like.
- Create a model of the solar system
- Design and make an astronaut's costume
- Learn, practise and record a song or poem about space
- Create a stop motion animation of the Earth's orbit around the sun (including the moon orbiting the Earth)

5 house points:

- Memorise the planets in order from the Sun and create a mnemonic to help you
- Watch an episode of a documentary about space and write summary notes
- Research the planets and find out the similarities and differences between them

Please remember the homework expectations for year 5

20 minutes of reading each day

TTRS 3x a week

Additional time on spelling shed!

This half term's House Project is:

Our solar system

Choose projects to achieve your House Points

By all means earn as many as you would like!

Tick off what you have completed to achieve your points.

15 house points:

- Make a poster of our solar system, including the sun and all of the planets
- Investigate how far apart the planets are and create an accurate picture to show this
- Create a leaflet about an inspirational person connected to space (e.g. Katherine Johnson, Neil Armstrong)

10 House points – Writing

Choose one or more creative writing tasks:

- Story: Write a short story about a child who discovers a new planet. What's it called? What do they find there?
- Poem: Write a poem about the beauty and mystery of space. It could rhyme, or be a free verse space poem.
- Letter: Write a letter home from space to tell your family about what you've seen and felt.
- Newspaper Report: Write a report about the first alien ever found on Mars! Include a catchy headline and quotes from witnesses.
- Play Script: Create a short scene set on a spaceship between astronauts.
